📍 Philippines

I'm a QA Engineer with a strong foundation in Manual Testing and practical experience in Automation Testing using Java and Selenium. I'm committed to delivering high-quality software by identifying issues early and enhancing testing processes to improve reliability and efficiency.

In addition to my QA background, I'm actively expanding my skill set in cybersecurity. Through hands-on platforms like TryHackMe and Hack The Box, I'm gaining experience in security testing and ethical hacking to better understand application vulnerabilities and contribute to more secure software development.

WORK EXPERIENCES

Software Quality Assurance Analyst
Seven Seven Global Services Inc. | 2022 - Present

As a QA Analyst specializing in manual testing, I ensure software quality by designing and executing test cases, identifying defects, and verifying fixes. I work closely with developers and product teams to deliver reliable, user-focused solutions and catch issues early in the development cycle.
